

ParcelSavvy

BRAND GUIDE

**A clear, confident identity for
property tax transparency.**

Version 1.0 | September 2026

The brand north star

ParcelSavvy exists to make a complicated public system understandable, comparable, and actionable.

Purpose

Give homeowners the context and confidence to understand how their property is assessed.

Promise

Turn public appraisal data into plain-language insight people can verify for themselves.

Ambition

Become the trusted independent starting point for property assessment questions.

GUIDING IDEA

Clarity creates confidence.

The product should help people understand the numbers before asking them to take action.

Positioning

The product is an explainer and evidence platform - not an aggressive tax protest service.

POSITIONING STATEMENT

For homeowners and real estate professionals who want to understand a property tax assessment, ParcelSavvy translates public appraisal records into clear comparisons and practical next steps - without hype, mystery, or pressure.

WE ARE

- An independent source of context
- Plain-language and evidence-led
- Useful before, during, and after protest season
- Honest when the data does not support action

WE ARE NOT

- A law firm or appraisal district
- A guaranteed tax-reduction service
- Alarmist, combative, or anti-government
- A black-box valuation oracle

Audience priorities

Design for a homeowner first; give real estate professionals enough rigor to recommend it

The concerned homeowner

“My value jumped. Is this normal, and where do I even begin?” Needs reassurance, definitions, comparison, and a clear next step.

The proactive homeowner

“I want to check the data before the protest deadline.” Needs speed, credible evidence, saved properties, and alerts.

The trusted advisor

“I need a reliable way to explain this to my client.” Needs shareable reports, methodology, and professional presentation.

UNIVERSAL USER NEED

“Show me what matters, explain why, and let me verify it.”

Every screen should lower cognitive load. Definitions appear in context; methodology is available without interrupting the task.

Messaging system

Lead with understanding. Follow with evidence. Invite action only when it is warranted.

PRIMARY TAGLINE

Know your property.
Understand your assessment.

ELEVATOR DESCRIPTION

ParcelSavvy helps homeowners understand their property tax assessment, compare similar properties, and see what deserves a closer look.

CAMPAIGN LINE

You know your home.
Now know your parcel.

Voice and tone

Knowledgeable enough to be trusted. Human enough to make the subject feel manageable.

CLEAR

Use ordinary language, short explanations, and visible calculations.

CANDID

Say what the data can and cannot establish.

CALM

Acknowledge concern without creating fear or urgency.

EMPOWERING

Give the user agency, evidence, and a practical next step.

CURIOUS

Invite people to explore why values differ; do not jump to conclusions.

HOUSE RULE

Never imply a homeowner is overassessed until the evidence supports it.

Copy in practice

Use specific, verifiable language. Avoid promises that the data cannot make.

SAY

Your assessed value increased 12% this year. Here is how that compares with similar properties nearby.

NOT

Your appraisal district raised your taxes again. Fight back now!

SAY

These properties share key characteristics with yours. Review the differences before choosing comparables.

NOT

We found the perfect comps to guarantee a reduction.

SAY

This result may be worth a closer look.

NOT

You are definitely overpaying.

PREFERRED TERMINOLOGY

assessment • appraised value • comparable property • review • evidence • context

Logo system

The mark combines neighboring homes, comparison, and a confident check - the core ParcelSavvy story.

ParcelSavvy

PRIMARY HORIZONTAL LOCKUP

Use in navigation, reports, partner materials, and campaign creative.

STANDALONE MARK

Use for the favicon, app tile, social avatar, and compact mobile states.

Logo standards

Protect recognition by keeping the mark simple, spacious, and consistent.

CLEAR SPACE

Maintain clear space equal to the height of one window pane (x) on every side.

NEVER

✗ Stretch or rotate

✗ Recolor individual shapes

✗ Add shadows or outlines

✗ Place on a busy image

✗ Rebuild the wordmark in another font

MINIMUM SIZE

Below these sizes, details and the wordmark lose clarity. Use the standalone mark in tight spaces.

Core color palette

Navy carries trust. Blue brings clarity. Coral adds energy without turning the experience into an alarm.

UI NEUTRALS

Recommended balance: 65% white/cloud • 20% navy • 10% blue • 5% coral

Digital color and accessibility

Brand color is not automatically interface color. Use accessible combinations for all functional text.

	Parcel Navy on white	#0B2D4D	14.03:1	AAA
	White on Action Blue	#1769AA	5.77:1	AA
	Slate on white	#52697A	5.74:1	AA
	Savvy Blue on white	#3F9DE6	2.93:1	Large/decorative only
	Insight Coral on white	#F26B55	3.00:1	Large/decorative only

ACTION BLUE #1769AA

Use this darker companion blue for buttons, links, keyboard focus, and other functional controls. Reserve Savvy Blue for the logo, charts, icons, and large display elements.

Typography

A modern, friendly display face paired with an exceptionally readable interface workhorse

DISPLAY + HEADINGS

Manrope

Use weights 600-800 for headlines, section titles, key metrics, and marketing moments.

The assessment, explained.

BODY + INTERFACE

Inter

Use weights 400-600 for body copy, labels, tables, tooltips, forms, and navigation.

Clear at every size.

DIGITAL SCALE

Display	H1	H2	H3	Body	Small	Label
48/56	36/44	28/36	22/30	16/24	14/20	12/16
700	700	700	650	400	400	600

Fallback stack: Manrope, Inter, system-ui, -apple-system, "Segoe UI", sans-serif

Layout and interface rhythm

A disciplined grid keeps dense property information calm and scannable

12-COLUMN DESKTOP GRID • 24 PX GUTTERS • 1200 PX MAX CONTENT WIDTH

SPACING

4 px base

8 / 12 / 16 / 24 / 32 / 48 / 64

RADIUS

Inputs 8 px

Cards 12 px

Pills 999 px

BORDERS

1 px #D7E1E8

Dividers before shadows

SHADOWS

Use sparingly

0 8px 24px rgba(11,45,77,.08)

Core components

Every component should clarify hierarchy, reduce uncertainty, or support a decision.

BUTTONS

Primary = one per task area. Secondary = supporting action.

SEARCH FIELD

Property address or account number

EVIDENCE STATUS

TOOLTIP PATTERN

RULE

Explain technical terms at the moment they appear. Tooltips should define the term first, then explain why it matters.

Data visualization

Use charts to reveal relationships - never to manufacture urgency.

ASSESSMENT HISTORY

CHART RULES

- Lead with the takeaway
- Show source and time period
- Use coral for one focal point
- Use direct labels when possible
- Never truncate an axis deceptively

SEMANTIC COLORS

- Positive
- Caution
- Issue
- Information

Imagery and iconography

Ground the brand in real homes, real records, and understandable evidence.

PHOTOGRAPHY

Natural neighborhood light, authentic Texas housing variety, people reviewing information at home. Avoid luxury-listing perfection.

ILLUSTRATION

Simple architectural geometry, parcel outlines, comparison patterns, and warm human moments. Keep line weight consistent.

ICONS

Rounded 2 px stroke, 24 px grid, simple metaphors. Pair unfamiliar icons with labels; never rely on color alone.

Applying the brand to search

The page feels useful within seconds: strong promise, simple search, compact results, visible credibility.

The screenshot shows a web browser window with the ParcelSavvy logo in the top left. The logo consists of a house icon with a checkmark and the text 'ParcelSavvy'. To the right of the logo are two links: 'How it works' and 'Property tax basics'. Below the logo is a large heading 'Know what your assessment means.' followed by a subtext 'Search Travis County property records and compare the numbers in context.' Below this is a search form with a text input field containing the placeholder 'Enter an address or account number' and a blue button labeled 'Search property'. Below the search form is a section titled 'Search results' which contains two rows of property information. Each row has a bold address, a smaller property type, and a bold price.

1234 Cedar Bend Dr Residential	\$612,400
1236 Cedar Bend Dr Residential	\$587,900

PAGE PRIORITIES

- Lead with the user's question
- Keep search dominant
- Use compact, divided result rows
- Explain terms in context
- Reserve coral for focus and insight
- Show data source and update date

Developer handoff

Use semantic tokens so the brand can evolve without rewriting every component.

CSS FOUNDATION

```
--brand-navy: #0B2D4D;  
--brand-blue: #3F9DE6;  
--brand-coral: #F26B55;  
--action-primary: #1769AA;  
--text-primary: #173042;  
--text-muted: #52697A;  
--surface-soft: #F6F9FC;  
--border-default: #D7E1E8;  
--radius-input: 8px;  
--radius-card: 12px;  
--space-unit: 4px;
```

IMPLEMENTATION CHECKLIST

- Use Manrope for display and Inter for UI/body
- Use Action Blue for functional controls
- Verify WCAG contrast in every state
- Keep search results compact and clearly divided
- Pair every tooltip trigger with keyboard access
- Use sentence case in labels and buttons
- Include source, year, and methodology context
- Treat the logo concept as a locked master asset

Brand governance

Consistency builds trust - especially when the subject is taxes and public data

1

CHECK

Does the claim match the evidence?

2

CLARIFY

Can a homeowner understand it without prior knowledge?

3

STANDARDIZE

Does it use approved tokens and components?

4

ACCESS

Does it work for keyboard, screen reader, and low vision users?

FINAL TEST

Would this help someone feel informed - not manipulated?
